

Ashok Kumar Parihar | Healthcare Data Analyst

MI, USA | +1(313)-213-3109 | ashokparihar2110@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Healthcare Data Analyst with 4+ years of experience delivering analytics solutions across payer and healthcare technology organizations. Experienced generating insights supporting population health analytics, healthcare utilization monitoring, and reimbursement performance reporting. Proven expertise analyzing large-scale healthcare claims, clinical, and population health datasets exceeding 5M records. Proficient in SQL, Python, Power BI, and Tableau for building analytics pipelines, predictive models, and enterprise dashboards. Hands-on experience integrating Epic and Cerner EHR datasets, evaluating healthcare quality indicators aligned with HEDIS benchmarks, and enabling data-driven healthcare decision making.

SKILLS

Healthcare Analytics: Healthcare Data Analytics, Healthcare Claims Analysis, Clinical Data Analysis, Patient Records Analysis, Population Health Analytics, Healthcare Utilization Analysis, Provider Reimbursement Analysis, Revenue Cycle Analytics, Healthcare Cost Analysis, Healthcare Operational Analytics, Healthcare Quality Metrics, HEDIS Analytics

Data Analysis & Statistical Methods: Exploratory Data Analysis (EDA), Predictive Analytics, Descriptive Analytics, Regression Analysis, Hypothesis Testing, Statistical Modeling, Root Cause Analysis, Data Mining, Trend Analysis

Programming & Query Languages: SQL (Advanced Queries, Joins, Window Functions), Python, R Programming, Advanced Excel

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Data Visualization & Business Intelligence: Power BI, Tableau, Power Query, DAX, Dashboard Development, KPI Reporting

Healthcare Systems & Standards: Electronic Health Records (EHR), Electronic Medical Records (EMR), Epic, Cerner, HL7, FHIR, ICD-10, CPT Coding

Data Engineering & Databases: ETL Processes, Data Warehousing, Data Modeling, Dimensional Modeling, Data Profiling, Data Integration, SQL Server, MySQL, PostgreSQL

Cloud & Data Platforms: AWS, Microsoft Azure, Google Cloud Platform, Snowflake, Databricks, Apache Spark, Amazon Redshift, Google BigQuery

Healthcare Compliance: HIPAA Compliance, Healthcare Data Privacy

CERTIFICATIONS

Excel Skills Job Simulation — JPMorgan Chase & Co.

Data Analytics Essentials — Cisco Networking Academy

Tableau Training Certification — Simplilearn

Data Science Certification Program — Simplilearn

EXPERIENCE

Healthcare Data Analyst | Cigna Healthcare | MI, USA Nov 2024 - Present

- Evaluated more than 5M healthcare claims and encounter records using advanced SQL queries and Python analytics, uncovering treatment patterns and utilization trends that improved payer analytics reporting accuracy.
- Engineered interactive Power BI dashboards with Power Query and DAX calculations, enabling analytics teams to track more than 20 operational KPIs including provider performance metrics and utilization trends.
- Integrated clinical and claims datasets originating from Epic and Cerner EHR systems, enabling population health teams to assess patient cohorts, treatment outcomes, and healthcare service utilization patterns.
- Optimized complex SQL queries across enterprise healthcare data warehouse environments, improving analytics processing efficiency and reducing reporting turnaround time by approximately 30%.
- Implemented predictive modeling workflows using Python libraries including Pandas, NumPy, and Scikit-learn, identifying high-risk patient groups and forecasting healthcare utilization trends.
- Examined healthcare quality indicators aligned with HEDIS performance benchmarks, supporting population health initiatives and quality measurement reporting across payer analytics programs.
- Established automated data validation and profiling pipelines, strengthening reliability of healthcare datasets used across enterprise analytics reporting environments.

Data Analyst – Healthcare Analytics | Innovaccer | India **Sep 2021 - Jun 2023**

- Assessed more than 3M patient records and healthcare claims transactions using SQL analytics workflows, generating population health insights used by healthcare organizations to monitor care delivery performance.
- Constructed Power BI and Tableau dashboards delivering analytics insights for healthcare provider and payer clients, visualizing patient outcome trends and provider performance indicators.
- Executed predictive analytics models using Python and R programming, identifying patient risk indicators and utilization drivers across large-scale clinical datasets.
- Performed ETL and data transformation processes integrating multiple healthcare data sources into centralized data warehouse environments supporting enterprise analytics reporting.
- Designed dimensional data models supporting healthcare business intelligence platforms, improving scalability of reporting environments used by analytics teams.
- Generated insights supporting healthcare quality monitoring initiatives aligned with HEDIS performance benchmarks across healthcare analytics programs.

Data Analyst - Healthcare Data Analytics | CitiusTech | India **Jun 2020 - Aug 2021**

- Investigated healthcare claims transactions and clinical datasets to identify operational patterns supporting analytics initiatives for payer and provider organizations.
- Developed SQL extraction pipelines using SQL Server, MySQL, and PostgreSQL databases, enabling structured healthcare analytics reporting across enterprise reporting systems.
- Created Tableau dashboards presenting care delivery insights and provider performance indicators, assisting analytics teams in monitoring healthcare operational trends.
- Processed healthcare datasets containing ICD-10 and CPT coded records, generating insights supporting reimbursement analytics and financial reporting workflows.
- Standardized healthcare datasets through transformation and validation workflows, improving data quality and readiness for enterprise analytics reporting environments.

PROJECTS

Healthcare Claims Analytics Dashboard

Tools: SQL, Power BI, Power Query, DAX, Python (Pandas, NumPy, Matplotlib)

- Designed Power BI dashboards analyzing more than 2M healthcare claims records, enabling analytics teams to evaluate provider performance patterns and healthcare utilization trends.
- Transformed claims datasets through SQL extraction queries and Power Query data preparation workflows, improving efficiency of analytics pipelines used for reporting.
- Performed exploratory data analysis using Python libraries including Pandas, NumPy, and Matplotlib, identifying anomalies and trends across large healthcare claims datasets.
- Delivered executive dashboards presenting utilization insights and operational metrics supporting leadership monitoring of healthcare performance indicators.

Population Health Predictive Analytics

Tools: Python, Scikit-learn, SQL, Tableau, Epic EHR, Cerner EHR

- Constructed predictive machine learning models using Python and Scikit-learn, identifying high-risk patient cohorts from large clinical datasets derived from healthcare operational systems.
- Evaluated treatment outcomes across Epic and Cerner electronic health record datasets, uncovering population health patterns across patient demographics and care programs.
- Produced Tableau dashboards visualizing population health indicators and healthcare quality benchmarks, assisting analytics teams in monitoring performance trends.
- Generated predictive insights supporting healthcare organizations in forecasting patient demand and planning healthcare resource allocation.

Healthcare Financial & Revenue Analytics

Tools: SQL, Power BI, Advanced Excel

- Examined healthcare financial datasets identifying reimbursement trends and revenue cycle performance patterns across healthcare reporting environments.
- Engineered Power BI dashboards presenting healthcare financial KPIs and reimbursement indicators, enabling finance teams to monitor cost and revenue performance.
- Conducted root cause investigations on discrepancies across healthcare billing transactions, identifying inconsistencies and improving financial data accuracy.
- Prepared financial analytics reports summarizing reimbursement performance and operational cost patterns supporting leadership decision making.

EDUCATION

Master's in Applied Data Analysis | University of Detroit Mercy | Detroit, USA

Apr 2025

Bachelor's in Mechanical Engineering | Anurag group of institutions | India **Jun 2021**
